LATEST WORKING EXPERIENCE

Head of Engineering

[SegurosIA](#) | [Insurtech](#)

📅 12/2023 Present 📍 Remote

As Head of Engineering, my mission is to make complex processes more accessible, reducing time and cost-intensive operations, increasing conversion, and boosting teams efficiency and productivity. My key contributions include:

- **Defining** and **leading** the **technical vision and strategy**, ensuring alignment with business goals.
- **Analyzing** and **building architectural designs** to ensure scalability, performance, and security meets requirements.
- **Designing** and **implementing agentic AI workflows** to boost team productivity and business impact with latest AI trends and technologies.

Senior Software Engineer

[Spotahome](#) | [Real Estate](#)

📅 04/2019 12/2023 📍 Remote

[Spotahome](#) is a real estate company with a business model focused on long-term stays, offering a fully online booking process experience. As a Senior Software Engineer at Spotahome, my key contributions included:

- **Leading** multiple projects for the landlord's B2B platform and **backoffice systems**, including the main landlord's publication listing funnel and also worked on main core microservices.
- I was one of the **core contributors** to the internal **design system**.
- Helping the team to **establish standards** for code reviews, security, and performance optimizations, optimistic strategies and caching strategies.
- **Mentoring and training** Junior developers.

Senior Software Engineer

[ITRS Group](#) | [Banking](#)

📅 03/2015 02/2019 📍 Málaga, Spain

[ITRS Group](#) help businesses monitor their IT operatives, with alerting solutions for the world's most demanding environments. As a Senior Software Engineer at ITRS Group, my key contributions included:

- **Leading** and **building** the main interactive **notebooks UI** (similar to Jupyter notebooks).
- I was one of the **core contributors** to the **JavaScript SDK** for ITRS Geneos, a realtime analytics and large-scale data processing engine.
- Acting as a bridge between **engineering and product**, translating technical challenges into business impacts.
- Driving the **adoption** of **new tools, frameworks, and practices** to keep the company competitive.
